

## ServiceNow Developer

### Job Location

Bangalore, Bengaluru , Karnataka, India

### Description

ESM (Enterprise System Management) group within Application Infrastructure is looking for a motivated and hands-on developer to join the ServiceNow ITSM (IT Service Management) team. The successful candidate will work with an existing team within all facets of development from requirements gathering, design, development, code reviews, testing, to deployment in production as well as designing, specifying, guiding development performed by more junior developers and reviewing their work product. ServiceNow is a vendor managed cloud service platform and the team customizes and builds applications within that platform as well as builds integrations with other systems and data sources.

### Responsibilities

- Experience developing in ServiceNow (JavaScript, workflows and flow designer, update sets)
  - ☐ Strong background in software development, software architecture, data structures, algorithms, and SDLC models
  - ☐ Knowledge of database application concepts, SQL, query optimization
  - ☐ Ability to work with customers, gather requirements and create solutions independently
  - ☐ Active participation within and among teams and colleagues distributed globally
  - ☐ Good verbal and written communication skills are a must
  - ☐ Good quantitative analytic skills, ability to work with large data sets
  - ☐ Excellent problem solving skills, in particular a methodical approach to dealing with problems across distributed systems.
  - ☐ Collaborate well with others, unafraid to provide and receive honest feedback.
  - ☐ Unit and functional testing skills

### Skills

ServiceNow Admin and ServiceNow developer training and certification a plus

- ☐ Experience with scripting languages such as Perl or Python, especially under Unix/Linux
- ☐ AngularJS and Node.js experience a plus
- ☐ Familiarity with SOAP, REST, XML, JSON
- ☐ Experience with web application user interface and usability concepts
- ☐ Understanding of secure software development concepts, especially in a cloud platform
- ☐ ITIL experience or certification is a plus
- ☐ Agile development experience
