SAP ABAP Consultant

Job Location
Gurgaon, Haryana, India

Description
Job Description:
Seeking a skilled SAP ABAP Developer with expertise in ABAP development, SAP HANA, CDS Views, and creating reports/forms/interfaces. Must have experience in SAP implementation and support projects, with strong problem-solving and communication skills. Willingness to travel required.

Responsibilities
Role: SAP ABAP
Job location: Gurgaon
Total Experience: 4+ years of experience.

Key Responsibilities:

- Develop and optimize ABAP programs and custom solutions.
- Work with SAP HANA and CDS Views.
- Create and manage forms, reports, interfaces, and conversions.
- Collaborate with functional teams for effective solution delivery.
- Perform unit testing and ensure quality of code.
- Provide technical support and troubleshooting as needed.

Skills

1. Technical Expertise:

- **SAP ABAP Development:** The candidate must have strong hands-on experience in ABAP development, including creating and modifying reports, forms, interfaces, and enhancements.
- **SAP HANA:** Proficiency in SAP HANA, including working with CDS Views and ODATA services.
- **Object-Oriented ABAP:** Experience with object-oriented programming in ABAP is essential.
- **Forms and Reports:** The candidate should be skilled in developing SAP Scripts, Smart Forms, Adobe Forms, ALV Reports, and Classical Reports.
- **Interfaces:** Experience with ALE/IDOC, BAPI, and other interfaces is required.
- **Conversions:** Should have expertise in LSMW (Legacy System Migration Workbench) and BDC (Batch Data Communication).
- **Enhancements:** Familiarity with User Exits, BADIs, Enhancement Spots, and BTEs.

2. Functional Knowledge:

- **SAP Modules:** Basic understanding of functional areas such as SAP
