Frontend Developer

Job Location
Bangalore, India

Description
Roles:
● Frontend Developer
● Actively participate and contribute to all aspects of the software development lifecycle including: brainstorm, architecture, design and technical tradeoffs and prioritization, implementation, quality assurance, and delivery for features slated for both our existing platform and new services.
● Continuously deliver rapid and consistent software and products that delight and engage our customers in tight collaboration with Product Managers and other members of the team.
● Improve our development processes and code quality, keeping us up-to-date with the latest industry trends.
● Taking initiative and ownership to complete given project
Culture fitments:
● Candidate should be enthusiastic and looking for the next challenging stint in his/her career
● Should be comfortable with startup work culture
● Ownership and accountability should be his/her DNA

Responsibilities
Required technical skills:
● Bachelor's Degree in Computer Science or similar discipline/B.E.
● 1-4 years of development experience in fast-paced startups as frontend developer
● Good knowledge on frontend technologies (HTML, JS, CSS, ReactJs and NextJS)
● Good problem-solving skills.
● Thrives in agile environments but also understands the balance in coding discipline
required for large scale, high quality, end consumer apps.
● Comfort and experience working with API development.
● Experience in both jumping into an existing architecture and starting projects from scratch.
● Proven ability to take initiative and dive into new areas of technology.
● Passion for learning, analysing technology trade-offs and shipping products.
● Full stack experience is a plus
● Knowledge on AWS is a plus
● Good logical thinking and fundamentally strong with concepts
