Angular Developer

Job Location
Bangalore, Karnataka, India

Description
We are looking for a talented Angular Developer to join our team.

Exp: 5 to 8 Years

You will be responsible for developing and maintaining web applications using Angular. As an Angular Developer, you will work closely with our team of designers and developers to build high-quality, scalable, and maintainable web applications.

Responsibilities

- Design and develop user-friendly and responsive web applications using Angular.
- Collaborate with the design team to develop a cohesive user interface.
- Work closely with back-end developers to integrate front-end functionality with back-end services.
- Write clean, efficient, and maintainable code.
- Participate in code reviews, design reviews, and testing.
- Troubleshoot and debug complex issues.
- Stay up-to-date with emerging trends and technologies in web development.
- Mentor junior developers and ensure adherence to coding standards and best practices.
