Core Java Developer

Job Location
Bangalore, Karnataka, India

Description
Job Title: Senior Software Engineer (Core Java)

Location: Bangalore
Experience: 5-8 year

We are looking for a skilled Senior Software Engineer (Java) to join our dynamic Technology team. If you have a strong background in Java development and a passion for creating high-quality, scalable, and secure applications, this role is for you.

Responsibilities
Key Responsibilities:

- – Design, develop, implement, and maintain Java-based applications.
- Translate business requirements into technical specifications.
- Participate in all phases of the Software Development Lifecycle (SDLC) including requirement gathering, analysis, design, development, testing, and integration.
- Identify and resolve production and non-production issues.
- Write clean, efficient, and secure code.
- Ensure the performance, security, stability, and quality of applications.
- Collaborate with team members to build scalable, secure, and high-quality products.
- Deploy new features and products into the production environment.

Key Skills

- **Core Java**: Extensive experience with Core Java programming.
- **Spring Boot:** Proficiency in Spring Boot framework for building microservices.
- **Hibernate Framework:** Strong understanding and experience with Hibernate for ORM.
- **Microservices**: Hands-on experience in developing and maintaining microservices architecture.
- **RESTful & SOAP Web Services:** Expertise in designing and consuming RESTful and SOAP web services. OOP Concepts, Exception Handling, Memory Management: Solid knowledge of object-oriented programming, exception handling, and memory management.
- **Databases**: Proficient with relational databases like MySQL and non-relational databases like MongoDB.
