Network and Firewall Administrator

Job Location
Bangalore, Karnataka, India

Description
Job Description: Network and Firewall Admin L2

Responsibilities:

- **Network Management**:
    - Install, configure, and maintain network hardware and software.
    - Monitor network performance and troubleshoot issues to ensure optimal performance.
    - Manage LAN, WAN, and WLAN networks, ensuring seamless connectivity.
- **Firewall Administration**:
    - Configure and manage firewalls to protect network infrastructure.
    - Implement security policies and rules to safeguard against unauthorized access.
    - Monitor firewall logs and respond to security incidents.
- **Application Management**:
    - Manage Privileged Access Management (PAM) solutions to control and monitor privileged accounts.
    - Administer Identity and Access Management (IDAM) systems to ensure secure user authentication and authorization.
    - Configure and maintain Web Application Firewalls (WAF) to protect web applications from threats.
- **DNS and SOC Operations**:
    - Manage DNS servers and ensure proper resolution of domain names.
    - Collaborate with Security Operations Center (SOC) to monitor and respond to security threats.
    - Conduct regular security assessments and vulnerability scans.
- **Documentation and Compliance**:
    - Maintain detailed documentation of network configurations, changes, and security policies.
    - Ensure compliance with industry standards and regulatory requirements.

Responsibilities
Skills and Qualifications:

- **Technical Skills**:
    - Proficiency in managing network and firewall environments.
    - Experience with PAM, IDAM, WAF, DNS, and SOC operations.
    - Knowledge of network protocols and security best practices.
