Oracle Cloud Implementation

Description

We are seeking a highly experienced and knowledgeable Oracle Cloud Implementation who can contribute and own the Order management processes. The ideal candidate will have a robust background in Oracle Cloud solutions, with a specialized focus on optimizing and implementing the Order to Cash cycle. This role requires strategic leadership for team handling, deep functional expertise, and a proven track record of successful Oracle Cloud ERP implementations.

Responsibilities

- **Lead Implementation**: Spearhead the end-to-end implementation of Oracle Cloud Order Management processes. Ensure seamless integration with existing systems and alignment with business objectives
- **Project Management**: Manage timelines, resources, and budgets to deliver projects on schedule and within cost constraints. Use agile methodologies and tools to monitor project progress and handle any issues that arise
- **Stakeholder Engagement**: Collaborate with internal and external stakeholders to define project scope, goals, and deliverables. Communicate effectively with cross-functional teams to ensure alignment and address any concerns
- **Customization and Configuration**: Customize and configure Oracle Cloud solutions to meet business needs and enhance functionality. Ensure the solutions are scalable and adaptable to changing business requirements
- **Training and Support**: Develop and deliver training to end-users, ensuring a smooth transition and adoption of the new systems. Provide ongoing support and enhancements post-implementation
- **Documentation**: Maintain comprehensive project documentation, including technical specifications, project plans, and reports for executive review

Skills

- Demonstrated expertise in **Oracle Cloud Order Management** and integration with other systems.
- Functional knowledge of Oracle Cloud modules, including **Order Management**, **Pricing**, **Global Order Promising**, and **Shipping**.
- Strong project management skills with experience using **agile methodologies** and project management tools.
- Excellent problem-solving, organizational, and analytical skills.
- Proven ability to lead, manage, and motivate **cross-functional teams**.
- Exceptional verbal and written communication skills.
