Senior Salesforce Developer

Job Location
Bangalore, Karnataka, India

Description
Salesforce Developer with work experience in designing, developing, testing and deployment of CRM solutions on the salesforce platform. The developer will work with the distributed team and will be responsible for designing and implementing end-to-end solutions and integrate with the in-house platform and infrastructure.

We are looking for a passionate hands-on programmer who is willing to spend most of the time in code and delivering quality code by working closely with development leads and
architecture teams in understanding and designing the solution. The candidate should be able to work collaboratively in a global setting and should be a go to person for troubleshooting any issues that may arise.

Responsibilities
External Primary Skills / Must have:
* Hands on experience and in-depth knowledge in LWC, AURA, Apex and Visualforce development.
* Designing solutions with out of the box features, custom configuration and code on the Salesforce platform.
* Experience in DEVOPS process using tools like FLOSUM, Jenkins or any CI/CD based tooling.
* Familiar in using SFDC metadata API using ANT migration too.
* Hands on experience in integrations using REST and SOAP, Workbench
* Knowledge of OOP concepts and application
* Good knowledge HTML5, CSS3, JavaScript and jQuery
* Write clean, scalable code using Salesforce programming languages
* Excellent troubleshooting and communication skills, and attention to detail.
* Ability to prioritize, be flexible and handle multiple projects with varying deadlines in a multi-task environment.

Skills
Desired Skills:
* Participate in requirements analysis
* Experience in Wealth Management or a similar financial environment
* Experience in working with Data teams to load and export large volume of data to and from Salesforce.
* Knowledge of Salesforce suite of products for integrations with other applications.
* Familiarity with Agile Methodology, Test-Driven Development and software design patterns.
* Test and deploy applications and systems with various teams
* Revise, update, refactor and debug code to improve existing software
* Develop documentation throughout the software development life cycle
* Willing to take up challenges and learn new technologies
